

Lego Club Challenge!

January 23, 2023

For today's challenge you will need the following:

Dice

Divided plate or 6 individual plates or bowls

Sticky notes and writing utensil

Lego Bricks

Your imagination

1. Sort your Lego bricks into the 6 piles (put them in the divided plate or individual bowls). You decide how to sort your bricks...maybe you will put all the plants a pile, mini figures in another pile, flat plates into another, yellow bricks in a pile, etc. You need six different groups.
2. Label each group of bricks with a number 1 to 6. You can use the sticky notes to write on and put a different number by each Lego group.
3. Its time to play! Roll the dice and whatever number you roll is the pile you will choose a piece from.
4. You can roll as many times as you want to collect enough bricks to create something.
5. You could set the total number of rolls before you begin...example: you will begin building after 20 rolls.

Happy building!
