

Lego Club Challenge: Reach New Heights!

January 30, 2023

For today's challenge you will help your Lego minifig explore your house!

1. Ask your minifig what part of your house they want to visit..maybe it is the kitchen counter, your bed or the couch.
2. Design a way to get your minifig to that new place. You could build them stairs, an elevator, a zip line, a hot air balloon.
3. Your minifig can travel in any direction...up, down or sideways.
4. If you don't have a minifig you could make one out of bricks or try using a small action figure.
5. Your minifig may want to visit more than one place in your house so be prepared to design several different ways to get your figure around.
