

Materials:

Two straws
Ping pong ball for the soccer ball
Lego Bricks

Directions:

Build your soccer field by creating a low wall of bricks in a rectangular shape. Be sure to include an opening at each end of the field that the ball will fit through. Look at the pictures below for pro tips.

You can add stands for your mini figure fans! If you don't have mini figures you can make some out of paper or use any little figures you have.

Game Play:

To play, each player stands at the end of the field so you can see your opponent's goal. Take turns using your straw to blow the soccer ball down the field, trying to get it into the goal. First person to score 5 goals wins!
